## Project Title

Wearable sensor for health monitoring

## Supervisor(s) Name(s) and Department affiliation

Amar Basu, Electrical and Computer Engineering

## Abstract

This project will involve a wearable sensor which monitors some aspect of human physiology (heart rate, sweat, motion, etc).

## Number of students and background and/or pre-requisites required

The project will involve an embedded system with bluetooth and android application. A highly motivated, committed, and interdisciplinary team is desired. Experience with bluetooth, serial protocols, Atmel, and android programming is a plus.

## Resources Required

## Budget Required
